

Surplus nylon screen tacked & framed in place. Includes east-facing soffits. Fresh air in, birds & bugs out! 😊

The Tyvek catches the breezes like a sail. And rattles! 😞

Rigid storm door to be installed here. Swings out.

The plan: removable acrylic windows & frames. Metal-mesh bug screens. Rigid screened-door. Manufactured & fitted. Soffits meshed over for air circulation & pest barrier.

An unavoidable gap. Temporary issue until windows & permanent flashing installed.

03/31/2026. Let's be 100% clear: this structure is FREE-STANDING and UNATTACHED to our main home. It's NOT an extension to our home. It's a screened-in pavilion. The double doors are NOT a throughfare.
